## BREEDING PLANS

1) Please list a summary of the expected goals for adding this dog as an outcross and for the specific outcross combination as well as plans for the next generation. In particular, why you feel this outcross dog is a good choice for the Tamaskan gene pool and what you feel it offers to the breed as a whole.

2) Please list a summary of the challenges (potential faults/flaws) that might appear in the next generation(s) with regard to bringing the future progeny back in line with the Tamaskan breed standard and any plans you have to overcome them (structural, coat, color/markings, temperament, etc).

## HEALTH

*If you have already completed any health tests for this dog, please input the information that you have, and include any documentation (e.g., certificates) for each item. If you are seeking pre-approval and have NOT completed any tests, you may skip this section.*

I am seeking:       Pre-Approval       Final Approval

Please list certificate/health test results here and attach a copy of certificate/results with proposal

Hip Score \_\_\_\_\_

Elbow Score \_\_\_\_\_

Eye Exam \_\_\_\_\_ Date \_\_\_\_\_

DM Status (select one):    Clear                       Carrier                       At Risk

Select all that applies:    MyDogDNA                       Embark                       GeneSeek

Other (please specify):

Certificate of Entirety    Yes                       No (Not Yet)                       Not Applicable

## DETAILS

1) Please list any and all health issues that have or may appear in the proposed candidate's bloodline/ancestry. When possible, this should include all information that may be available regarding the candidate's offspring, siblings, parents, parents' siblings, grandparents, grandparents' siblings, etc.

with the Committee of Breeders

v2020.01

2) Please list any known health issues in the breed(s) that make up this outcross or in the ancestry of this outcross. Specifically, make note of any documented cases of Epilepsy, heart disease or issues, Addison's disease, Cryptorchidism, Exocrine Pancreatic Insufficiency (EPI), etc.

ADDITIONAL HEALTH TESTS (optional unless specified)

**NOTE: Please do NOT do these tests unless you have received instruction from the Committee of Breeders! Not all tests are applicable to all candidates, and required testing may change as knowledge of canine genetics and diseases improve.**

Please select any that applies:

- DNA test for Multi-Drug Resistance (MDR1)
- DNA test for Canine Pituitary Dwarfism (CPD)

v2020.01

## TEMPERAMENT

Provide information about the proposed outcross dog's temperament.

Examples include, but are not limited to: a written declaration by the owner, an impartial third-party evaluation, or official certificates pertaining to temperament, such as a passing temperament exam, obedience titles, service or therapy dog qualifications, etc. This can also include photos and/or videos of the proposed outcross dog interacting with other dogs, children, cats, etc. The more information the better, as well as any negative aspects or potential behavioural and/or temperament issues. Include copies of any relevant certificates with your proposal.

## PHOTOS

Please provide photos of the proposed outcross dog, and if possible, the parents and siblings. Photos should show the dog from various angles: from the side and front, in stance, close-up of the dog's head etc.

Videos of the dog's movement (trot) are also very welcome.
